

BIOGRAPHY

Andrew Cardoni

Lead Software Developer of Design Profit, Munro & Associates, Inc.

Andrew Cardoni brings Munro & Associates, Inc seventeen years of experience in software development for industries ranging from accounting to manufacturing. As a senior developer at a leading accounting software provider, Andrew was the primary developer for the Billing module in their award-winning practice management software. In addition, he also developed new solutions for Data Integration with other enterprise applications. As lead developer of the Design Profit development team, Andrew has been instrumental in developing key features of Design Profit such as custom fields and the versatile formula engine.

With over 11 years of experience developing in C# and the .net framework in both desktop and web based applications, Andrew has the technical and architectural knowledge to develop high quality applications and services using the latest technologies. As an advocate of test driven development and continuous integration he has instituted systems and team practices that provide high-quality software via early identification of bugs and rapid delivery of features and updates.

Andrew has a bachelor of science in Applied Mathematics and Chemistry from the University of Miami, Coral Gables.
