

# **BIOGRAPHY**

## **Anthony DeLoy**

Associate Engineer, Munro & Associates, Inc.

With more than 15 years of experience in mechanical repair and diagnostics, Anthony DeLoy offers Munro & Associates' clients extensive expertise in craftsmanship, repair issues, and redesign concepts.

Prior to joining Munro & Associates, Anthony held a position as a High Horsepower Tractor Technician for Farm Depot in Caro, Michigan. As lead technician for the tractor line, Anthony was responsible for computer aided diagnostic repairs. Other repairs included engine related issues, hydraulic, and electrical concerns. As the lead technician, Anthony was responsible for in-shop repairs, as well as field repairs. He aided in the repairs of various agriculture equipment, such as planting, application, and harvest equipment. Some of the lines include Fendt, Challenger, Rogator, TerraGator, and Lexion Combines.

Before Farm Depot, Anthony was a fleet manager with Jays Septic Tank Service. During the time with the company, he was responsible for maintaining a fleet of over 100 pieces of equipment. This equipment included excavation as well as over the road and off road trucks and trailers. Anthony was responsible for overseeing preventative maintenance, fabrication, equipment upgrades, diagnostics, and all repairs related to the fleet.

Anthony's career started out with him honing his skills at Northwestern Auto Diesel College in Lima Ohio. There he achieved a 4.0 GPA, and achieved an associate's degree in applied science while attending the 2 year program, which included classes in steering and suspension, auto and manual transmissions, and computer aided diagnostics of any and all vehicle manufacturers. During the program, Anthony excelled in high performance design and fabrication of the automotive concepts.

Anthony has skills in a wide variety of mechanical and electrical fields which are applicable for today's market. These skills include fabrication of ferrous and non-ferrous alloys, the understanding of electrical wiring and diagnostics, both hydraulic and air operated systems, and light and heavy duty truck equipment. Anthony is also a self-motivated and highly driven who understands how to deal with different clients' products on a daily basis.

During Anthony's off time, he enjoys camping, fishing and spending time with his family. Due to his 15 years of experience in high performance chassis and
