

# **BIOGRAPHY**

## **Dave DeWolf**

Senior Technical Writer, Munro & Associates, Inc.

Dave DeWolf has worked in the technical communication field for over twenty-five years. His primary role has been as a documentation specialist, mostly in the automotive industry. Currently, Dave works in Munro's Design Profit<sup>®</sup> development group where he documents new software features, such as the costing model. Dave also supports Munro's sales and marketing efforts by writing articles and reviewing proposals.

Prior to joining Munro, Dave wrote government certification documents for on-board diagnostic systems (OBD). Working under contract at Bosch, the largest automotive supplier in the world, Dave served as the lead contact for over 400 emissions relevant fault paths and presented the final product to Fiat Chrysler for approval. Fiat Chrysler successfully certified their vehicles for production.

While employed at MAHLE Powertrain, Dave wrote calibration guides for General Motors Hybrid Electric Vehicles, working onsite at GM's Proving Grounds in Milford, Michigan. Also at MAHLE, Dave spent 8 years at the Chrysler Proving Grounds in Chelsea, Michigan, documenting various powertrain control systems for Chrysler's latest electronic control modules.

Dave's past projects also include requirements gathering and web publishing for Ford Motor Company, and various other engineering specifications such as: software documentation, user interface design, and online help for Ford diagnostic service tools. Dave has also developed service manuals, performed customer support, and been a team leader.

Dave spent 2 years at Michigan Technological University in Houghton, Michigan studying an electrical engineering curriculum before obtaining a BA in English at Oakland University in Rochester, Michigan. In his spare time, when he is not doing home repairs, yard work, or watching the Tigers and Red Wings, Dave enjoys reading world literature and classic science fiction. He lives in Hamburg, Michigan with his wife and two teen age children.
