

BIOGRAPHY

Maggie Juan Lang

Senior Statistician, Design Profit, Munro & Associates, Inc.

Maggie J. Lang works closely with costing engineers and application developers to provide fully automated product costing models by using Munro's proprietary tool Design Profit. She translates and converts costing algorithms into Design Profit. By using mathematical modeling and statistical methods, she provides accurate, reliable, and quick cost estimate to our customers.

Prior to joining Munro & Associates, Inc. Maggie worked as Statistician at Michigan State University and Ted Wills Law firm. She was doing research and applying statistical modeling on projects in diversified industries, e.g. Automobile, Healthcare, Biology, Psychology, etc. She has solid and experienced background in statistics and its applications

Maggie has cross-disciplinary education background. She has earned her 2nd master degree in statistics at Michigan State University and her 1st Master degree in Mass Communication from Nanyang Technological University in Singapore and obtained Bachelor degree in Economics from Southeast University in China.
