

BIOGRAPHY

Dennis Petroni

Associate Engineer, Munro & Associates, Inc.

Dennis has spent his entire working career in the automotive business, working for both OEMs and suppliers. He spent time at Chrysler Corporation and Nissan, USA.

While at Chrysler, Dennis worked as a cost estimator in the Chassis group. He was responsible for change notice accuracy for chassis piece cost, tooling and dies. Dennis was also involved in some supplier negotiations.

At Nissan, Dennis was responsible for brake and accelerator pedals, steering column, window regulators.

Dennis also spent time at automotive suppliers such as Progressive Tool & Industries Co., F. Joseph Lamb, Citation Tool Company and Tesco Engineering. While at these companies, Dennis worked as a Cost Estimator. These companies generally built automatic and robotic welding equipment.

Dennis joined Munro & Associates in April of 2015. During his time with Munro, Dennis has worked on multiple automotive benchmarking projects including a full teardown and costing analysis of a BMW i3.

(BSBA – Lawrence Technological University, Associate Degree Detroit Engineering Institute)
