

BIOGRAPHY

“Wendy” Wanjie Zhu

Statistician, Design Profit®, Munro & Associates, Inc.

Wendy Wanjie Zhu is currently a statistician for Design Profit Munro & Associates, Inc. Wendy has a good knowledge background of how to analyze mass databases, build models, as well as different software skills to work on the databases, include R, SAS, SQL, Minitab, Matlab, LaTeX, C/C++, VB and QB.

Prior, Wendy finished a master’s degree in statistics in Michigan State University and received a bachelor’s degree in applied mathematics from Xiamen University of China.

For Munro & Associates, Wendy’s duties include obtaining a good understanding of the cost and time calculations for different manufacturing processes and then transfer the earned knowledge to the Design Profit custom fields, creating Click2Cost surfaces for different calculation systems.

During her bachelor and master’s programs, Wendy developed the important skill of data analysis and calculations, as well as using software to write calculation methods to solve the problems.

Wendy also likes to study different software in her free time, such as the SAS and SQL. Wendy hopes that the study experience of different software can help transfer new methodologies to Design Profit.

During her leisure time, Wendy likes to travel seeing the nature’s views and taking beautiful pictures. Wendy also likes to enjoy the delicious foods of different cultures. Wendy currently lives in East Lansing, MI.
